

DCIS

A PRACTICAL GUIDE

Donna Pinto, Patient Advocate & Founder of DCIS 411

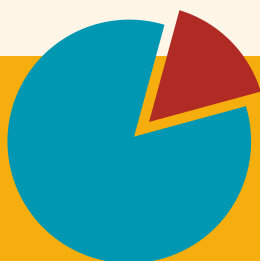

MINDSET SHIFT

“DCIS is not cancer.
It is a risk factor for cancer.”

— Dr. Laura Esserman
WHEN CANCER IS NOT CANCER

80% IS “NEVER CANCER”

“80% of DCIS cases never develop into IBC,
meaning many diagnoses could lead to
unnecessary treatment.”

— Jelle Wesseling,
When Cancer isn't Really Cancer

OVERDIAGNOSIS & OVERTREATMENT

“Those who are overdiagnosed are harmed simply
because they have come for screening. They are
treated unnecessarily and are exposed to side
effects of the treatment.”

— PROFESSOR MICHAEL BAUM:
“YOU CANNOT SAY THAT BREAST SCREENING SAVES LIVES”

A HEALTH WAKE-UP CALL
